

# Healthy Trees For Tomorrow

## Volunteer opportunity on Dartmoor

Join us to assess tree health on Walkhampton common  
– full training provided

### The data you collect will

-  Identify important areas of natural tree regeneration, current and future threats
-  Inform future habitat management for wildlife, natural flood management and other ecosystem benefits

### Benefits of helping

-  Deeper understanding of moorland ecology
-  Chance to explore Walkhampton and meet new people
-  Valuable contribution to help protect and enhance our National Park

### Who are you?

-  You are fit and capable, passionate about (or interested to learn more about) trees
-  Available for a couple of days in May and June 2023
-  Are digitally able – the survey data will be collected on personal smartphones

### Who are we?

Local organisations working in partnership with Foundation for Common Land and DNPA:

**Corylus Ecology** - Dedicated to understanding more about species, habitats and how best to protect them  
**Evolving Forests** - Passionate about the place of trees in our landscapes now and in the future

### Survey days & contact

May - 17<sup>th</sup> & 18<sup>th</sup> and June - 7<sup>th</sup> & 8<sup>th</sup>
